Full Shop 24 is an automatic, easy to use vending machine developed and manufactured by Laservideo srl which guarantees complete privacy for the consumer when purchasing any kind of products.

Full Shop 24 can be installed in any kind of location such as gas stations and car washes. Thanks to its adaptability and its easy installation procedure, it is also suitable for convenience stores, shopping centres, airports and car parks, etc.

Full shop 24 is ideal for products such as adult gadgets and material as well as audiovisual items, car wash soaps and accessories, cigarettes, sweets, batteries, films and snacks and drinks. The Full Shop spring system is able to sell products of various dimensions: the springs can be made to size and are easily interchangeable which guarantees extraordinary modularity.

Start your own business

Starting a new business is easier and more convenient than you could imagine. Simply identify the locations you think would be ideal to install one or more Full Shop 24 vending machines. When sourcing locations remember to consider that high foot and vehicular traffic areas will raise your income potential.

This is a profitable and interesting business opportunity as it does not involve fixed expenses such as staff costs and shop rentals and the machine is mobile, without any permanency obligation in the same location.

The key advantages of this business opportunity are:

- Sell 24/7
- High margin profits
- Immediate collections
- No staff costs
- Easy installation (inside or outside)
- Self managing
- Antivandalism structure
- Multi products

Laservideo gives you all you need to start your business:

- Audiovisual products and adult items
- Centralized management and reporting (collections, security, sold products, etc.)
- Statutory and regulatory prerequisites
- Consulting on purchasing and stock management
- Consulting on contracts for the locations
- Consumer privacy
- Machine customization

On the Full Shop 24 could be installed the adult age identification system and it is protected by a polycarbonate sliding door which gives the consumer privacy while purchasing to permit the sale of any kind of adult items, also during daytime. The Full Shop 24 could work by cash or credit card.

A back lit LCD with 1 cm high letters (making it easy to read), leads the consumer through the purchase operations, for an easy and intuitive product supply.

The Full Shop 24 control system is equipped with GSM technology which allows to you to monitor your purchases and unsold products remotely which enables you to manage your business **at all times**.

fullshop24

The product supply is dispensed by an exclusive control system. The withdrawal compartment is equipped with a locking system that only disengages when the consumer takes the product and thereafter it is reactivated.

The Full Shop 24 is equipped with a secure fastening system and 3 steel security rings, an hermetic body (welded to create a single piece) and it is watertight complete with an anti-rust coating and 10mm anti vandalism glass. You also have the option of installing an alarm that is activated when the machine is shaken or if there is an attempted break in.

The rollaway curtain installed on the Full Shop 24 can be completely or partially lowered, depending on the time of day and the kind of product which is being sold. If a product of an adult nature is being purchased, the curtain is completely raised only after the major age recognition, in order to show the complete range of products inside.
